PRIMARY BUSINESS

IT Staffing &
Professional Services

OUR MISSION

"To deliver high-caliber technology talent and domain-specialized professionals that enable IT, healthcare and insurance organizations to innovate, secure, and scale their operations."

Zinoit Tech LLC is a U.S.-based staffing and workforce solutions provider specializing in Information Technology staffing and insurance domain support services.

We support enterprise clients, MSP/VMS programs, and regulated organizations by delivering high-caliber, technically validated, and compliance-ready professionals aligned with business objectives, regulatory expectations, and operational requirements.

Our operating model is designed to meet the standards of organizations requiring structured governance, data security awareness, and adherence to enterprise compliance frameworks.

Service Distribution

IT Staffing

Data, AI/ML, Cloud, Cybersecurity, Software

64%

Insurance Domain

Claims, Underwriting, Compliance, Business Analysis

26%

Healthcare Support

Health Informatics, Care Management, UM Coordinators

10%

Scope of IT Staffing Services

Our core competency is sourcing, vetting, and placing highly skilled IT professionals across technical disciplines that are critical to IT, Insurance and Healthcare operations.

Data, Analytics & Artificial Intelligence

Data Engineers · Data Scientists · ML/AI Engineers · BI Developers · Data Governance

2.1 Data Engineering

Core Expertise

ROLES WE PLACE

- Data Pipeline Architects
- ETL / ELT Engineers
- Data Platform Engineers
- Streaming Data Engineers
- DataOps Engineers
- Data Lakehouse Architects

TECHNOLOGIES

Apache Spark Kafka Apache Flink
Airflow dbt Snowflake Databricks
Delta Lake Apache Iceberg
AWS Glue Azure Data Factory
BigQuery Apache Hudi DBT Cloud

ADVANCED USE CASES

Real-Time Claims Processing Pipelines

Sub-second latency streaming pipelines using Apache Kafka & Flink for live claims validation, fraud flag propagation, and adjudication triggers.

EDI 837/835 Transaction Engineering

Enterprise-scale ingestion, transformation, and validation of ANSI X12 EDI transactions including claims (837P/I) and remittance (835) data.

FHIR-Compliant Data Lakes

CMS interoperability-mandate-ready data lakes with FHIR R4 / HL7 v2 normalization, enabling patient data exchange across payer and provider systems.

Cloud Data Platform Migrations

End-to-end lift-and-shift and re-architecture of on-premise data warehouses to Snowflake, Databricks Lakehouse, or BigQuery with zero data loss.

Data, Analytics & Artificial Intelligence

Data Engineers · Data Scientists · ML/AI Engineers · BI Developers · Data Governance

2.2 Data Science & Analytics

Deep Expertise

ROLES WE PLACE

- Data Scientists
- ML Engineers (Predictive Modeling)
- Statistical Analysts
- Business Intelligence Developers
- Data Governance & Quality Specialists
- Quantitative Analysts

TECHNOLOGIES

Python R SQL Tableau
Power BI SAS scikit-learn
XGBoost TensorFlow Alteryx
Azure Synapse Databricks ML
Looker SPSS

ADVANCED USE CASES

Predictive Risk Scoring & Actuarial Models

Statistical and ML models to predict member risk scores, enabling proactive care management and accurate premium pricing for insurance payers.

Medical Fraud, Waste & Abuse (FWA) Detection

Anomaly detection pipelines using ensemble methods and graph analytics to flag suspicious claims patterns in real time before payment.

Member Churn & Retention Analytics

Behavioral segmentation and survival analysis models identifying at-risk members, driving targeted outreach and retention strategies.

Claims Cost Forecasting & Financial Analytics

Time-series and regression models for monthly claims trend forecasting, budget variance analysis, and stop-loss trigger management.

2.3 Artificial Intelligence & Machine Learning Emerging Tech

ROLES WE PLACE

- AI Engineers
- ML Platform Engineers
- NLP Engineers
- Computer Vision Engineers
- MLOps Engineers
- Generative AI Engineers

TECHNOLOGIES

PyTorch TensorFlow Hugging Face
LangChain LlamaIndex
AWS SageMaker Azure ML Vertex AI
OpenAI APIs MLflow Ray
Pinecone Weaviate ONNX

ADVANCED USE CASES

Automated Claims Adjudication & Prior Authorization AI

End-to-end ML pipelines that classify, route, and auto-adjudicate routine claims with configurable approval thresholds, reducing manual review by up to 70%.

Clinical NLP for ICD/CPT Code Extraction

Transformer-based NLP models extracting and suggesting ICD-10, CPT, and HCPCS codes from free-text clinical notes and discharge summaries with high accuracy.

Generative AI Member Self-Service Chatbots

RAG-based conversational AI agents grounded in plan documents that answer benefits, coverage, and claims-status questions — reducing call center volume.

Predictive Denial Management & Appeals Automation

ML classifiers identifying high-risk claims before submission and auto-generating compliant appeal letters for denied claims to accelerate revenue recovery.

2.4 Cloud, DevOps & Infrastructure Cloud Native

ROLES WE PLACE

- Cloud Architects (AWS / Azure / GCP)
- DevOps & CI/CD Engineers
- Site Reliability Engineers (SRE)
- Infrastructure & Platform Engineers
- FinOps Specialists
- Security & Compliance Engineers

TECHNOLOGIES

AWS Azure GCP Kubernetes
Terraform Docker GitHub Actions
Jenkins Ansible Pulumi
Prometheus Grafana
HashiCorp Vault ArgoCD

ADVANCED USE CASES

Secure Cloud Infrastructure for Healthcare

End-to-end design and implementation of cloud environments with encryption at rest/in-transit, audit logging, and granular IAM access controls.

Zero-Trust Network Architecture & DevSecOps

Security-first CI/CD pipelines with SAST/DAST scanning, secrets management (Vault), and policy-as-code enforcement via OPA/Conftest.

Automated DR/BCP for Claims Systems

Disaster recovery automation achieving RTO < 1 hour and RPO < 15 minutes for mission-critical claims processing and member-facing systems.

Container Orchestration for Claims Microservices

Kubernetes-based deployment, auto-scaling, and full-stack observability (Prometheus/Grafana) for high-throughput claims ingestion and processing services.

Cybersecurity & Risk Management

Security Engineers · IAM · SOC Analysts · Risk & Compliance · Penetration Testers

2.5 Cybersecurity Engineering

Roles: Security Engineers · Cloud Security Architects · Pen Testers · SOC Analysts · IAM Specialists · Compliance Engineers

Splunk MS Sentinel CrowdStrike Palo Alto

Zero Trust SAST/DAST

Regulatory Expertise

NIST 800-53 SOC 2 FedRAMP PCI-DSS

HITECH

2.6 Software Engineering

Roles: Full Stack · Backend · Frontend · API Developers · DevOps / SRE Engineers

Java Python Node.js React Angular

.NET Spring Boot REST/GraphQL

Use Cases: Claims systems · Member/provider portals · FHIR/HL7 interop · Cloud migration

2.7 Software Architecture

Roles: Enterprise Architects · Solution Architects · Cloud Architects · Integration Architects

AWS Azure GCP Microservices Event-Driven Arch

API Gateways SOADDD

USE CASES

- › Core platform modernization
- › Cloud-native transformation
- › Enterprise integration strategy
- › Scalability & resilience design

03

Insurance Domain & Business Operations

Healthcare & Insurance Domain Staffing

Claims · Underwriting · Policy Admin · Compliance · Care Management · Health Informatics

Complementing our core IT capabilities, Zinoit Tech LLC places experienced non-IT professionals with deep insurance and healthcare domain knowledge — enabling seamless alignment between operational processes and technology initiatives.

- **Claims Analysts & Claims Processing Specialists** — Medical, dental, and vision claims review and adjudication
- **Underwriters** — Property, casualty, health and life insurance underwriting
- **Policy Administration Professionals** — Policy setup, endorsements, renewals, and cancellations
- **Insurance Business Analysts** — Requirements gathering, process improvement, system documentation
- **Risk & Compliance Analysts** — ACA, ERISA, Medicare/Medicaid, state insurance regulations
- **Utilization Management / Care Management Coordinators** — UM processes, prior authorizations, care coordination
- **Health Informatics Specialists** — Clinical coding (ICD-10, CPT, HCPCS), medical records management
- **Project Managers (PMPs)** — Healthcare IT implementations, go-live support, vendor management

04

Service Delivery Models

Contract Staffing
C2C / W2

Contract-to-Hire
Flexible transition

Direct Hire
Full-time placement

Project-Based
Scoped engagements

MSP/VMS
Enterprise programs

05

Talent Screening Framework

A structured, consistent approach to candidate evaluation ensuring only thoroughly vetted professionals are presented to clients.

- **Multi-Stage Technical Screening**

Competency validation through role-specific assessments and panel interviews

- **Professional Verification**

Verification of experience, credentials, and certifications

- **Domain Assessments**

Role-specific technical and domain knowledge evaluation

- **Client Onboarding Alignment**

Adherence to client-specific compliance, NDA, and security requirements

06

Compliance & Risk Management

Employment Compliance

- **E-Verify Compliant** — Enrolled employer; all placements verified
- **Federal & State Regulations** — Adherence to all applicable employment regulations
- **Worker Classification** — Proper documentation and classification practices

Data Security & Confidentiality

- **NDA Enforcement** — Strict confidentiality and non-disclosure obligations
- **Information Security** — Alignment with client-specific security policies

07

Insurance Coverage

Zinoit Tech LLC maintains comprehensive insurance coverage aligned with enterprise vendor requirements. All policies are active and maintained in good standing — documentation available upon request.

- **General Liability Insurance**

Primary coverage for third-party bodily injury and property damage

- **Umbrella / Excess Liability**

Additional protection layer above primary policies

- **Workers' Compensation**

Coverage for work-related injuries and illnesses

- **Employers Liability Insurance**

Protection against employee work-related claims

- **Technology E&O / Professional Liability**

Coverage for errors and omissions in professional IT services

- **Cyber & Privacy Liability**

Protection against cyber events and data breaches

- **First-Party Cyber Coverage**

Business interruption and ransomware event coverage

- **Crime Insurance**

Including social engineering and employee dishonesty coverage

- **Business Owner's Policy (BOP)**

Business property and general liability combined

- **Hired Auto Physical Damage**

Coverage for business-related vehicle use

08

MSP/VMS & Enterprise Engagement Capability

MSP/VMS Onboarding

Full participation in managed service provider and vendor management system programs with complete compliance processing

Vendor Risk Assessments

Prepared to respond to vendor risk questionnaires, security audits, and due diligence reviews

SLA-Driven Delivery

Defined time-to-fill, quality, and compliance metrics with structured delivery commitments

Stakeholder Coordination

Experienced engagement with procurement, vendor management, and hiring teams across enterprise environments

09 | Key Differentiators

✓ Deep Domain Expertise

Healthcare and insurance industry knowledge combined with cutting-edge IT staffing capabilities.

✓ Compliance-Ready Talent

Proven placement of professionals with HIPAA, NIST, SOC 2, and enterprise security familiarity.

✓ High-Demand Specializations

Focused talent pools in AI/ML, Cybersecurity, and Data Engineering.

✓ Flexible Engagement Models

Contract, C2H, direct hire, and project-based models for enterprise procurement.

✓ Fast Time-to-Fill

Average 5–10 business days contract; 15–20 days direct hire.

✓ Diversity & Inclusion

Committed to DEI in all talent sourcing for a broad and diverse candidate pool.

10 | Industries Served

Insurance & Healthcare

Primary focus — deep regulatory and domain alignment

Technology & Digital Enterprises

SaaS, fintech, enterprise software, product companies

Financial Services

Banking, capital markets, insurance carriers

Life Sciences & Biotech

Clinical systems, regulatory data management

Government & Public Sector

FedRAMP-familiar professionals for regulated environments

Let's Build a Partnership

Zinoit Tech LLC is committed to delivering high-quality, compliant, and scalable staffing solutions aligned with enterprise workforce requirements. We welcome the opportunity to partner with your organization.
